Maths Difficulties – Identification and Practical Solutions

Friday, 27 October, 2017

Judy Hornigold	
<p>Judy is an independent educational consultant specialising in dyscalculia and dyslexia and has been a Singapore Maths trainer, for UK based <i>Maths No Problem</i> since 2014. She is particularly passionate about the teaching of maths and of finding ways to support learners with dyscalculia and general maths learning difficulties.</p> <p>Consequently, Judy has written the PG Cert in Dyscalculia and Maths Learning Difficulties for Edge Hill University and an accredited dyscalculia course for the BDA.</p> <p>Judy lectures on Inclusion for Edge Hill University and is an Associate Tutor for the BDA. She also delivers lectures and workshops throughout the UK and internationally. She has written several books on dyscalculia and maths generally, as well as a guide for parents of children with dyslexia.</p>

PROGRAMME	
Time	Workshop
8.15am	Registration – Tea & Coffee, Networking
9.00am – 3.30pm	Workshop
	<p>This training will look at the reasons why so many children struggle with maths, including dyscalculia and maths anxiety. It will then move on to look at a range of strategies that will support these children including techniques such as visualisation and bar modelling. How to get the most out of concrete manipulatives will also be explored.</p> <div style="display: flex; align-items: center;">  <p>The training will be very hands on with plenty of practical activities that practitioners will be able to implement straight away in their teaching.</p> <p>The training will refer to up to date research in this area, from practitioners and researchers including:</p> <ul style="list-style-type: none"> Prof. Steve Chinn Prof. Brian Butterworth Prof. Jo Boaler </div>
