Resource Price List

Understanding Learning Difficulties: A Practical Guide Revised 2019

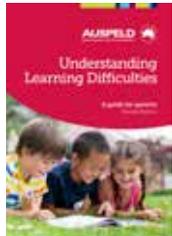

\$55.00

This booklet, in conjunction with the enclosed CD, is designed to provide principals, teachers and school psychologists throughout Australia, with a greater awareness and understanding of the significant impact learning disabilities can have on students, and to outline the most effective remediation

and accommodation strategies available to them in the classroom. The CD contains a copy of the Guide plus a wide range of effective resources and strategies, all of which can be saved and printed for use throughout the school.

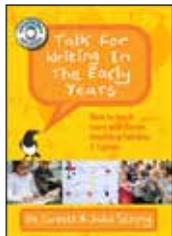

Understanding Learning Difficulties: A Guide for Parents Revised 2019

\$25.00

This Guide has been designed and produced to provide parents and carers with current information about the nature of learning disabilities in children, and to offer practical guidance on the most appropriate identification, intervention and support.

Talk for Writing in the Early Years (2-5 years)

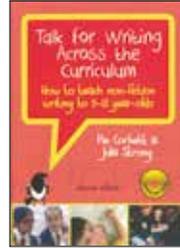

\$97.00

This book shows early years settings how to set up the approach and how to involve parents, carers and other family members through learning the same stories that the children are learning. This family involvement not only helps the children's linguistic development but also increases the confidence of family members

in supporting their children. This practical resource offers: 9 stories and rhymes together with storymaps for kindergarten-age children, and another 9 for Foundation Stage children. Includes 2 DVDs.

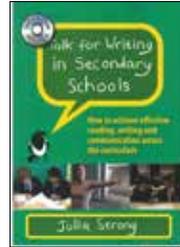

Talk for Writing Across the Curriculum (5-12 years)

\$88.00

This book shows you how to help children speak the language of non-fiction before they attempt to write it. This is a three-step process using fun, multi-sensory activities. It helps build children's confidence and linguistic ability so that they are able to create their own writing.

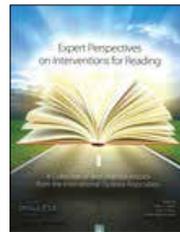

Talk for Writing in Secondary Schools

\$88.00

Building on best practice, this practical guide takes you step by step through how to establish quality written communication across the secondary curriculum. It can be used as a handbook by a literacy coordinator to lead the approach as well as being a source of practical ideas for each subject area. Includes a DVD.

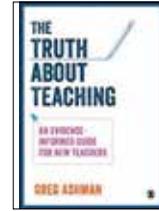

Expert Perspectives on Interventions for Reading

\$60.00

This book brings together the most requested and timeless articles on key literacy related topics over the last decade from IDA's *Perspectives on Language and Literacy*. Inside you will find a solid foundation of research-based, classroom-tested principles in a practice-ready format that is ideal for educators who are seeking gold standard solutions to the intractable problems of illiteracy.

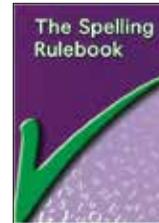

The Truth About Teaching

\$49.00

Drawing on years of experience teaching in a diverse range of schools and powered by a nuanced understanding of educational research, **Greg Ashman** presents the most vital ideas that you need to know in order to succeed in teaching. Find out how to avoid common mistakes and challenge some of the myths about what good teaching really is.

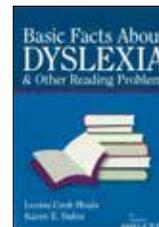

The Spelling Rulebook

\$43.00

Understanding the linguistic rules and phonic principles of English spelling is the key to success with spelling. This indispensable reference book explains the spelling system of the English Language and how it has developed.

Basic Facts about Dyslexia

\$50.00

A must-have guide for any parent or teacher of a child struggling to learn to read, this essential resource begins by answering the question "What is dyslexia?"

Flexitables

\$8.00 each

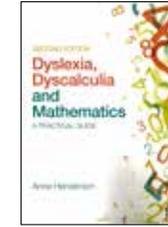

Flexitables are tactile and made of soft flexible plastic. Children love manipulating them when trying to discover the answer. Our grids are particularly useful for teaching children with learning difficulties as they can be taught on a "one to one" basis at their own speed.

The tables are available in:

- Multiplication
- Fraction
- Addition
- Number Square

Contact Auspeld for details of school packs.

Dyslexia, Dyscalculia and Mathematics

\$55.00

Dyslexia, Dyscalculia and Mathematics will be an essential resource for teachers, classroom assistants, and SENCOs who help dyslexic and dyscalculic children with their understanding of mathematics. This practical book reveals helpful ways in which to tackle both simple and complex concepts with students of all ages.

Tales of Literacy for the 21st Century

\$28.00

Tales of Literacy for the 21st Century tackles some of the most difficult questions for the next generation around literacy and thought. What will happen to our children and to ourselves as we move from a literacy-based culture to a digital one?

Making Sense of Interventions for Children with Developmental Disorders

\$42.00

This book, aimed at both parents and professionals, discusses the non-evidence-based 'crank' interventions that proliferate in the fields of children's speech, language, literacy, fluency, voice, communication, attention, cognition, working memory, behaviour and social connectedness. It explores the science - or lack thereof - behind

the interventions and suggests evidence-based alternatives that enjoy stronger scientific support.
