Decodable Book Selector – Extended Code

Different series of decodable books have different scope and sequences, as a result they do not introduce GPCs (Grapheme Phoneme Correspondence – or the relationships between sounds and spellings) in the same order.

To assist teachers and other educators select decodable books for use by their students that their target phonemes and graphemes, SPELD NSW has prepared a collection of these "Decodable Book Selectors. The organisation of decodable readers in this Extended Phonics Code Decodable Book Selector is a suggested guide to the selection and organisation of readers from a range of different series by phoneme. We do hope that these Decodable Book Selectors assist you in effectively selecting and organising your decodable books!

Please note that for this Decodable Book Selector we have included only Decodable Book Series that introduce <u>one phoneme</u> per book in the Extended Code. There are a range of high-quality decodable book series that introduce a number of phonemes per book in the Extended Code, these books are great for students to read to consolidate previously taught phonic code.

To see a full range of the decodable readers sold by SPELD NSW please go to the SPELD NSW bookstore. For other Decodable Book Selectors for the Basic Code or for Intervention Resources please see the SPELD NSW website.

In collating this Decodable Book Selector, we have done our best to ensure that each book is placed in the best place in relation to the focus scope and sequence. We note:

- The Information contained about each book is the set/level within the decodable book series that each book belongs and the name of the book, along with the GPCs covered in that book in the column to the left of the title.
- Where there is a "revision book" in a set/level that book has been included after the last book.
- If you have any feedback about these Decodable Book Selectors we would love it if you would let us know (enquiries@speldnsw.org.au)
